## AUTHOR INDEX

- A**bstracts—2001 Annual Conference of The Israeli Society of Plant Sciences ..... 49: 149–171
- Aceto, S. *See* Cozzolino, S.
- Agrawal, S.C. and Singh, V. Water stress, low light, heat and UV exposure in *Chlorella vulgaris* ..... 49: 27–32
- Aguinagalde, I., Rebordinos, I., Mohanty, A., and Martín, J.P. Chloroplast DNA diversity in the wild shrub *Cytisus scoparius* L. (Leguminosae) ..... 50: 1–9
- Akaydin, G. and Dogan, M. A new species of *Acantholimon* Boiss. (Plumbaginaceae) from the western Taurus Mountains, Turkey ..... 50: 67–71
- Akgün, I. *See* Sagsöz, S.
- Aki, C. *See* Ben-Shalom, N.
- Akkaya, A. *See* Biçakçı, A.
- Akman, Y. *See* Ketenoglu, O.
- Albert, M.J., Iriondo, J.M., and Pérez-García, F. Effects of temperature and pretreatments on seed germination of nine semiarid species from NE Spain ..... 50: 103–112
- Amir, R. *See* Galili, G.
- Amzallag, G.N. and Seligmann, H. Plant-to-plant interactions during physiological adaptation to salinity in *Sorghum bicolor* ..... 48: 247–254
- Amzallag, G.N. Dual response to nutrients in *Sorghum bicolor*: The role of critical periods in expression of adaptive plasticity ..... 50: 87–93
- Andreucci, A.C. *See* Ciccarelli, D.
- Anikster, Y. Host–parasite relations in a population of wild emmer in eastern Galilee ..... 49: S-37–S-41
- Ardi, R. *See* Ben-Shalom, N.
- Ascensão, L., de Silva, J.A.T., Barroso, J.G., Figueiredo, A.C., and Pedro, L.G. Glandular trichomes and essential oils of *Helichrysum Stoechas* ..... 49: 115–122
- Aslan, A., Yazıcı, K., and Karagöz, Y., Lichen flora of the Murgul district, Artvin, Turkey ..... 50: 77–81
- Aslan, A. Lichens from the regions of Artvin, Erzurum, and Kars (Turkey) ..... 48: 143–155
- Avni, Y. *See* Gichua, M.K.
- Aydogdu, M., Hamzaoglu, E., and Kurt, L. New halophytic syntaxa from Central Anatolia (Turkey) ..... 50: 313–323
- Aydogdu, M. *See* Cansaran, A.
- Aydogdu, M. *See* Ketenoglu, O.
- Aytaç, Z. and Duman, H. *Alyssum nezaketiae*: New species from Central Anatolia ..... 48: 317–319
- Aytaç, Z., Ünal, F., and Pinar, M.N. Morphological, palynological, and cytbotaxonomical study of *Ebenus longipes* Boiss. & Bal. and *E. argentea* Siehe ex Bornm. (Leguminosae) from Turkey ..... 48: 321–326
- B**Baker, D.A. Long-distance vascular transport of endogenous hormones in plants and their role in source:sink regulation ..... 48: 199–203
- Bañón, S. *See* Franco, J.A.
- Bar-Nun, N. and Mayer, A.M. Composition of and changes in storage compounds in *Orobanche aegyptiaca* seeds dur-
- ing preconditioning ..... 50: 277–279
- Barroso, J.G. *See* Ascensão, L.
- Benamar, A. *See* Corbineau, F.
- Benedettini, G. *See* Loppi, S.
- Ben-Shalom, N., Aki, C., Ardi, R., and Pinto, R. Elicitation effects of chitin oligomers and chitosan sprayed on the leaves of cucumber (*Cucumis sativus*) and bean (*Phaseolus vulgaris*) plants ..... 50: 199–206
- Ben-Shalom, N., Kudabeava, N., and Pinto, R. Differences in the elicitation of soluble and ionic bound enzymes in tomato leaves using chitin derivatives ..... 50: 259–263
- Ben-Tal, Y. Are gibberellins capable of replacing the environmental flowering signal? ..... 48: 205–215
- Bi, Y.R. *See* Guo, J.K.
- Bi, Y.R. *See* Zhang, L.X.
- Biçakçı, A., Akkaya, A., Malyer, H., Ünlü, M. and Sapan, N. Pollen calendar of Isparta, Turkey ..... 48: 67–70
- Bischler, H. Species–environment relationships and diversity of liverworts in Israel ..... 51: S-15–S-23
- Bızsel, K.C. *See* Bızsel, N.
- Bızsel, N. and Bızsel, K.C. New records of toxic algae *Heterosigma* cf. *akashiwae* and *Gymnodinium* cf. *mikimotoi* in the hypereutrophic Izmir Bay (Aegean Sea): Coupling between organisms and water quality parameters ..... 50: 33–44
- Böhling, N., Greuter, W., Raus, T., Snogerup, B., Snogerup, S., and Zuber, D. Notes on the Cretan mistletoe, *Viscum album* subsp. *Creticum* subsp. *nova* (Loranthaceae/Viscaceae) ..... 51: S-77–S-84
- Boscaiu, M. and Güemes, J. Breeding system and conservation strategy of the extremely endangered *Cistus carthaginensis* Pau (Cistaceae) of Spain ..... 49: 213–220
- Bukanya, R.Z. *See* Nyafuono, J.F.
- C**alamassi, R., Paoletti, E., and Strati, S. Frost hardening and resistance in three Aleppo pine (*Pinus halepensis* Mill.) provenances ..... 49: 179–186
- Cansaran, A. and Aydogdu, M. Phytosociological research on Egerli Mountain (Amasya, Turkiye) ..... 49: 309–326
- Caporali, E., Grünanger, P., Marziani, G., Servettaz, O., and Spada, A. Molecular (RAPD) analysis of some taxa of the *Ophrys Bertolonii* aggregate (Orchidaceae) ..... 49: 85–89
- Caputo, P. *See* Cozzolino, S.
- Carrión-Vilches, M.A. *See* Werner, O.
- Chakrabarty, D., Mandal, A.K.A., and Datta, S.K. SEM and light microscopic studies on direct shoot regeneration from ray florets of chrysanthemum ..... 48: 105–107
- Chakrabarty, D. *See* Datta, S.K.
- Chatziphilippidis, G. *See* Konstantinidis, P.
- Chen, S.L., He, T.N., Liu, J.Q., and Hong, D.Y. Embryology of *Crawfurdia delavayi* (Gentianaceae) and its systematic value ..... 48: 113–119
- Cheon, C.P., Chung, M.Y., and Chung, M.G. Allozyme and

- clonal diversity in Korean populations of *Ardisia japonica* and *Ardisia crenata* (Myrsinaceae) ..... 48: 239–245
- Chung, M.G. *See* Cheon, C.P.
- Chung, M.Y. *See* Cheon, C.P.
- Ciccarelli, D., Andreucci, A.C., and Pagni, A.M. The “black nodules” of *Hypericum perforatum* L. subsp. *perforatum*: morphological, anatomical, and histochemical studies during the course of ontogenesis ..... 49: 33–40
- Cleland, R.E. *See* Lavee, S.
- Cohen, O. Studies on the genus *Scandix* L. (Apiaceae) I: *Scandix verna* spec. nov. The new identity of the common *Scandix* species in Israel ..... 51: S-25–S-35
- Côme, D. *See* Corbineau, F.
- Conte, L. *See* Cristofolini, G.
- Corbineau, F., Benamar, A., and Côme, D. Changes in sensitivity to abscisic acid of the developing and maturing embryo of two wheat cultivars with different sprouting susceptibility ..... 48: 189–197
- Cozzolino, S., Aceto, S., Caputo, P., Widmer, A., and Dafni, A. Speciation processes in Eastern Mediterranean *Orchis* s.l. species: molecular evidence and the role of pollination biology ..... 49: 91–103
- Crespo, M.B., de León, A.R., and Ríos, S. *Borreria* Adans. (Asteraceae, Heliantheae), a new record for the Mediterranean flora ..... 50: 239–242
- Cristofolini, G. and Conte, L. Phylogenetic patterns and endemism genesis in *Cytisus* Desf. (Leguminosae–Cytiseae) and related genera ..... 51: S-37–S-50
- Cros, V. *See* Franco, J.A.
- D**afni, A. and Shmida, A. Andromonoecy in *Colchicum stevenii* C. Koch (Liliaceae)—frequency, phenology, and reserve allocation ..... 51: S-51–S-57
- Dafni, A. *See* Cozzolino, S.
- Datta, S.K., Misra, P., Mandal, A.K.A., Deepti, and Chakrabarty, D. Direct shoot organogenesis from different explants of chrysanthemum, marigold, and tuberose ..... 50: 287–291
- Datta, S.K. *See* Chakrabarty, D.
- De Dominicis, V. *See* Loppi, S.
- De Dominicis, V. *See* Salerni, E.
- de León, A.R. *See* Crespo, M.B.
- de Silva, J.A.T. *See* Ascensão, L.
- Deepti, *See* Datta, S.K.
- Delmer, D.P., Holland, N., Holland, D., Peng, L.C., and Kawagoe, Y. Genes and proteins involved in cellulose synthesis in plants ..... 48: 165–171
- DeMagistri, A.A. Germination of serotinous cone seeds in *Cupressus* spp. ..... 49: 253–258
- Demir, I. The effect of controlled hydration treatment on germination and seedling emergence of unaged and aged pepper seeds during development ..... 50: 251–257
- Demirörs, M. *See* Yurdakulol, E.
- Destito, G. *See* Loppi, S.
- Dogan, M. *See* Akaydin, G.
- Dönmez, E.O. *See* Pinar, N.M.
- Duman, H. A new species of *Arabis* L. (Brassicaceae) from South Anatolia ..... 49: 237–240
- Duman, H. *See* Aytac, Z.
- Duran, A. A new species of *Scorzonera* L. (Asteraceae) from Central Anatolia, Turkey ..... 50: 155–159
- Durmus, N. *See* Saruhan, N.
- Düsén, O.D. and Sümbül, H. *Ornithogalum pamphylicum*: New species from South Anatolia ..... 50: 73–76
- E**kmekci, Y. and Terzioglu, S. Changes in the electrophoretic pattern of soluble shoot proteins of wild and cultivated tetraploid wheats following cold acclimation and freezing ..... 50: 95–102
- Ellanskaya, I.A., Nevo, E., Wasser, S.P., Volz, P.A., and Sokolova, E.V. Species diversity of soil micromycetes in two contrasting soils at the Tabigha microsite (Israel) ..... 48: 309–315
- Escudero, A. *See* Gavilán R.G.
- Ezrati, S., Pnini-Cohen, S., Schuster, S., and Zilberman, A. Zahir Eyal's research directions ..... 49: S-1–S-4
- F**ahima, T. *See* Zhang, F.
- Fahn, A. Functions and location of secretory tissues in plants and their possible evolutionary trends ..... 51: S-59–S-64
- Feldman, M. *See* Ozkan, H.
- Feldman, M. The contribution of the discovery of wild emmer to an understanding of wheat evolution and domestication and to wheat improvement ..... 49: S-25–S-35
- Feng, J. *See* Zhang, L.X.
- Ferrandis, P. Influence of a low-intensity fire on a *Pinus halepensis* Mill. forest seed bank and its consequences on the early stages of plant succession ..... 49: 105–114
- Figueiredo, A.C. *See* Ascensão, L.
- Finkel, M. Biodiversity and interslope divergence of vascular plants caused by sharp microclimatic differences at “Evolution Canyon” II, Lower Nahal Keziv, Upper Galilee, Israel ..... 49: 285–295
- Franco, J.A., Cros, V., Bañón, S., and Martínez-Sánchez, J.J. Nursery irrigation regimes and establishment irrigation affect the postplanting growth of *Limonium cossonianum* in semiarid conditions ..... 50: 25–32
- Frati, L. *See* Loppi, S.
- G**ale, M.D. Comparative genetics and cereal evolution ..... 49: S-19–S-23
- Galili, G., Tang, G., Zhu, X., Amir, R., Levanony, H., Shy, G., and Herman, E.M. Plant seeds: An exciting model system for dissecting molecular and cellular regulation of metabolic processes ..... 48: 181–187
- Galili, S., Weinberg, Z., and Leshem, Y. The use of SDS polyacrylamide gel electrophoresis for detection of protein degradation during silage fermentation ... 48: 97–98
- Gao, X. *See* Liu, D.
- García-Mozo, H., Hidalgo, P.J., Galán, C., Gómez-Casero, M.T., and Domínguez, E. Catkin frost damage in Mediterranean cork-oak (*Quercus suber* L.) ..... 49: 41–47
- Gavilán R.G., Sánchez-Mata, D., Escudero, A., and Rubio, A.

- Spatial structure and interspecific interactions in Mediterranean high mountain vegetation (Sistema Central, Spain) ..... **50:** 217–228
- Gichua, M.K., Avni, Y., and Guterman, Y. The effect of habitat and erosion on the distribution and development of *Pistacia atlantica* trees in the central Negev highlands of Israel ..... **50:** 281–286

# ISRAEL JOURNAL OF PLANT SCIENCES

## NOTICE TO CONTRIBUTORS

The **Israel Journal of Plant Sciences** publishes contributions from all over the world dealing with all aspects of plant sciences. Review articles, mini-reviews, and short communications are also accepted. Contributions should not have been published elsewhere. All manuscripts will be subject to peer review.

Papers for publication (in triplicate) and books for review should be addressed to the editor: **Professor A.M. Mayer, Department of Botany, The Hebrew University of Jerusalem, Jerusalem, 91904, Israel.** Original articles, if accepted, become the property of the publisher and may not be published elsewhere, in whole or in part, without permission. The author submitting the manuscript should give his/her telephone and fax numbers, and e-mail address.

**Manuscripts** should be printed on one side only and double-spaced, with side margins not less than 3 cm wide. Authors should retain a copy of their manuscript.

Papers should be written concisely and clearly in English. Regular articles should not normally exceed 10–12 printed pages, not including tables and figures (a full page of text contains 500–600 words). For general presentation, headings, and legends to figures and tables, follow the style used in current issues of the Journal. An abstract suitable for reproduction by abstracting journal (not exceeding 200 words) is required at the beginning of the paper. A suggested organization of an article is: Abstract, Introduction, Materials and Methods, Results, Discussion, Acknowledgments (if any), and References.

Spelling of the names for plants should follow "Index Kewensis." The complete scientific name (genus, species, and authority) should be cited for each plant at its first mention. Plant names should follow the following format:

*Viola novae-angliae* subsp. *grisea* (Fernald) Gil-ad,  
stat. & comb. nov.

For the geographical nomenclature of Israel, refer to *Israel—Touring Map 1:250,000*, Survey of Israel, 1992.

The Editor reserves the right to perform editorial changes or to return a manuscript to the author for revision. To expedite publication, authors should submit the final accepted version on a diskette along with the revised manuscript. First preference is for a Macintosh diskette, using Microsoft Word format. However, any Macintosh or PC-compatible diskette is acceptable. Please include both original files (indicate what program and version were used) and an ASCII version of the final accepted paper.

**References** in the text should be cited by the author's name and year of publication, e.g., "(Smith and Brown, 1980)" or "as stated by Smith and Brown (1980)." The list of references should be arranged alphabetically by author at the end of the text. Titles of articles cited should be given in

full; abbreviate titles of periodicals according to the "International List of Periodical Title Word Abbreviations." Cite titles of books in full, including the name of the publisher and the place of publication.

### Sample references:

- Ito, S. 1971. The perisimmon. In: Hulme, A.C., ed. The biochemistry of fruits and their products. Vol 2. Academic Press, London, pp. 281–301.  
Lifshitz, R., Kloepper, J.W., Scher, F., Tipping, E.M., Laliberte, M. 1986. Nitrogen-fixing Pseudomonas isolated from roots of plants grown in the Canadian high Arctic. *Appl. Environ. Microbiol.* 51: 251–255.

No editorial responsibility can be taken for the accuracy of the references; authors are requested to check these with special care.

Authors should suggest a **running title** not exceeding 35 letters and spaces, as well as 3–6 key words. The corresponding author should be indicated and all authors' names should be given in full.

Three sets of **illustrations** (original and two photocopies) should be submitted. If figures are computer-generated, please include them on a disk, in a non-proprietary format (TIFF, EPS, PICT, JPEG), along with the hard copy. Each copy of a drawing or photograph should be identified on the back with the author's name, the figure number, and its orientation. **Figure captions** should be listed together on a separate sheet. If the scale is important, it should be indicated on the figure itself; reduction or magnification should preferably not be indicated in the caption, as printing reduction has to be taken into account. **Graph lettering** should be large enough (10–12 points) to be legible when reduced to final size. All photographs should be submitted as glossy prints.

Illustrations in color can be accepted only if the author defrays the cost. If appropriate, a color photograph can be accepted, at no cost to the author, for the cover of the Journal.

**Proofs** should be returned to the Publisher immediately. Proofreading should be limited to the correction of typographical errors; substantial changes may be charged to the author. Authors are entitled to 25 free reprints of their article, and may purchase copies of the issue in which it appears at a reduced rate. Additional reprints may also be ordered, at extra cost, at the proof stage.
